

# Bamboo Hotel Guest Key Cards

SALTO offers contactless RFID hotel key cards for all eco-minded hotels and resorts that want to replace plastic key cards. Wooden key cards have proven to be equally durable as compared to the traditional plastic key card, but, unlike plastic, wood is a renewable and biodegradable resource. Besides being a green option in sustainability, wooden key cards will also impress hotel guests with their aesthetic appeal. Made to the same thickness as an existing key card or event pass, SALTO's environmentally friendlier card looks and feels the same as a plastic card. SALTO wooden key cards are made of bamboo, which is ecologically sustainable, and birch, an ultra-flat wood ideal for offering a plastic-free solution to key cards.
